

# GoRecycle ensures the responsible recycling of refrigeration and cooling appliances

GoRecycle is the only legal organization recognized by RECYC-QUÉBEC ensuring the recycling of domestic cooling and air-conditioning appliances. Its mission is to fight against climate change by reducing the release of halocarbons found in refrigeration appliances, which are potent greenhouse gases.

In Quebec, approximately

# 300,000

cooling appliances  
are not recycled  
properly each year.

A refrigerator or freezer  
properly recycled

=

# one ton

of GHGs avoided

We have more than **260 drop-off** locations across Quebec which allow you to dispose of your appliances for free!

   Let's go, recycle the right way.

# GoRecycle's Ecosystem

+ 175 members throughout Quebec

## Appliances recovered by GoRecycle

Our priority: collecting and recycling appliances that represent an environmental risk

### Appliances with gas and halocarbon foams

- Refrigerators and freezers
- Cellars and wine coolers
- Water dispensers
- Plug-in air conditioners (mobile or window)
- Dehumidifiers

### Other appliances accepted in our drop-off locations

- Stoves, ovens, dishwashers, washers and dryers, and more.

## Concrete results after 2 years of operation:

+

200,000

cooling appliances collected

+

220,000

tons of GHGs avoided

+

95%

of the appliances' materials are recovered
