

GoRecycle ensures the responsible recycling of household cooling appliances

GoRecycle is the only organization recognized by RECYC-QUÉBEC ensuring the recycling of domestic cooling and air conditioning appliances.

Its mission is to fight climate change by reducing the release of halocarbons found in refrigeration appliances, which are potent greenhouse gases.

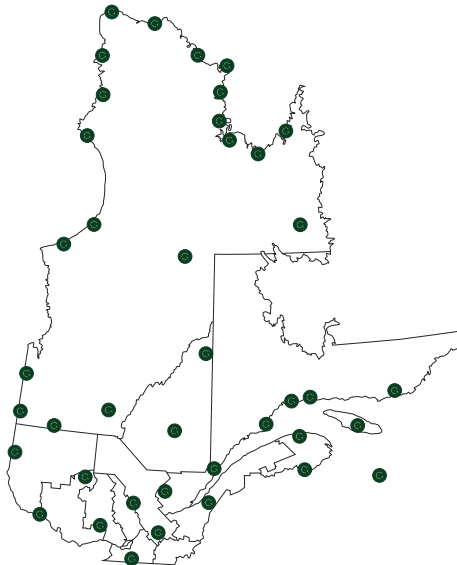

In Québec, approximately

300,000

cooling appliances

are not recycled properly each year.

300

drop-off points

across Québec which allow you to dispose of your appliances for free!

1 cooling appliance recycled

=

1 ton of GHGs avoided

GoRecycle Ecosystem

178
members
throughout Quebec

local recyclers

+500
collection points

Our priority is to collect and recycle appliances that represent an environmental risk. These are the appliances we recover:

Appliances containing halocarbons with insulating foam

Refrigerator Freezer Cellar and wine cooler

Appliances containing halocarbons without insulating foam

Portable or windows air conditioners Water cooler Dehumidifier

We also accept other appliances at our drop-off locations: Stoves, ovens, dishwashers, washers and dryers, and more.

Tangible results after 3 years of operation:

364,976 cooling appliances collected	 The equivalent of 70,000 trips around the Earth	+95% of recovered materials
